REPAIRS • RESTORATIONS • COMMERCIAL ROOFING

PROJECT PROFILE

Completed project

Metal roof restoration

Malakoff, Texas

Manufacturing-facility roof

80,000+ sq. ft.	20-year warranty	Standing-seam metal

THE CHALLENGE

Oxidation, fastener movement and leaks at seams and penetrations affected an aging manufacturing-facility roof. Replacement would have caused expense and operational disruption.

THE RAMTECH APPROACH

Evaluate the roof, reinforce fasteners, restore seams and penetrations, prepare surfaces and apply a fluid-applied restoration system with quality checks throughout installation.

THE RESULT

The completed system restored waterproof integrity, eliminated leaks, improved reflectivity and extended roof service life while avoiding tear-off. The completed project carries a 20-year warranty.

Repair first. Restore second. Replace last.
