RAMTECH ROOFING
REPAIRS • RESTORATIONS • COMMERCIAL ROOFING

PROJECT PROFILE

Completed 2023

PVC roof restoration

Mineral Wells, Texas

Completed industrial roof restoration

290,000 sq. ft.	20-year L&M warranty	Aged PVC / metal details

THE CHALLENGE

Recurring leaks affected an aged PVC roof at an occupied industrial facility. Replacement would have added cost, waste and disruption to daily operations.

THE RAMTECH APPROACH

Evaluate the roof, repair and reinforce leak points, prepare the PVC membrane and metal transitions, then apply high-solids silicone restoration.

THE RESULT

The completed system provides restored watertight integrity, a reflective finish and 20-year manufacturer labor-and-material protection without full tear-off.
